

# Digital Laser M Fact Sheet

## The Digital Laser M

Dreaming of sharp, saturated color on your short run print and envelope jobs? Well, dream no more. The Digital Laser M is here for you, delivering proof quality, full color laser printing for quantities of 5,000 or less. This short run digital laser printer can complement or replace your offset production runs.

Besides the get-noticed precision color quality, the new Digital M Laser can print at quick speeds of up to 60 personalized envelopes per minute. The "one-pass" quality capability can output personalized messages, images, return indicias and more simultaneously.

## Key Features

- Patent pending precision registration allows for "one pass" front and side registration.
- Operates at quality performance speeds of up to 3,600 per hour for #10 envelopes, with excellent color consistency throughout the print run on a wide variety of envelope stocks and sizes.
- The fiery utility controller automatically optimizes the reproduction of print for the brightest colors, sharpest and clearest text and images. Prints companion pieces such as postcards, brochures, flyers, direct mail envelopes and letterheads.
- Specially designed feeding capabilities allow for efficient delivery of thick stocks and long edge delivery of envelopes while producing wrinkle-free print quality.
