

# Stay Safe. Stay Healthy. Stay Informed.

The safety and healthcare industries are rapidly growing market segments. Seize the opportunity to let labels make a healthier and safer difference. From functional styles to durable finishes, we have it all. We do more than offer labels; we offer labels that work smarter for every professional who makes safety, health and wellness a priority.

If your looking for safety and health labels, let us help. We offer digital solutions for short-runs, laser die-cutting for custom shapes, and additional custom capabilities that help create your perfect label.

## Common Health & Safety Labels

### Hand Sanitizer & Soap Labels

These labels need to hold up through exposure to moisture and constant handling. Our durable label materials and finishes are essential in creating a quality finished product.

### Hand Washing Labels

Use labels to easily attach reminder signs on mirrors, sinks or walls! Add your company name or logo, use custom colors, or design your own artwork to personalize these for your needs.

### Face Shield Labels

Apply labels on face shields to promote your brand, add employee's names and photos, or incorporate some personality onto your protective equipment.

### Face Mask & Social Distancing Labels

Utilize labels to communicate face mask policies on entrance doors and windows. Designate seating and waiting areas, or mark aisles and walkways to direct traffic flow that promotes social distancing.

*\*The sample labels shown were laser die-cut and printed on a digital press. The stock used is perfect for both short-run and large flexo quantities. They were sheeted with perforation on the roll for efficient peeling and use a standard gloss laminate that protects against most elements.*

# Popular Stock Options

Face stock and adhesive are crucial to the success of your product or application. The following details our most popular stock for safety and health related labels.

<b>White or Clear Film - Permanent Adhesive</b> White or clear poly facestock with permanent adhesive	Tear resistant or water resistant with lamination	Gloss Varnish (UV), Matte Varnish, Thermal Transfer Imprintable Varnish, Textured, Writable Varnish	160° -20°

## Custom Die-Cutting Options

### Custom Conventional Dies

There are many styles of dies available to manufacture labels. Dies can be tooled to create styles such as square or round corners, circles, bursts, ovals, special shapes, individual sheets, etc.

### Laser Die-Cutting

Laser die-cutting means no die or hard tooling necessary and is great for low volume runs. We can reproduce custom unique die-cuts easily, quickly, and accurately without purchasing a costly die.

## Did You Know...

**We offer Desk Dividers to create a physical separation and shield from coughing, sneezing, and spreading germs!**

- Move from one room to the next quickly and easily with our lightweight and free-standing desk shield.
- Easy to disinfect and reuse, these dividers set up and knock down in seconds.
- Clear plastic window areas offer optimal visibility from two sides.
- We die-cut all pieces with rounded corners for safety and secure the windows with plastic rivets.
- Our economical dividers also feature a convenient handle, magnetic closures and two durable sign holders for stability on flat surfaces.
